Class IV Laser therapy is a non-invasive, scientifically proven treatment for an extensive range of conditions including osteoarthritis.

The laser beam penetrates deeply into the tissues and induces a biological response which helps to reduce pain and inflammation, as well as speed up the healing process.

The laser beam is delivered over the affected area via a hand piece.

Laser treatment is pain free and provides a gentle warming affect to the area, which lots of pets really enjoy.

Reduce **Pain**
Reduce **Inflammation**
Speed **Healing**

What conditions can laser therapy help my pet with?

Acute conditions

- Wounds
- Infections – such as skin & ear problems
- Abdominal discomfort
- Post dental treatment
- Sprains, strains, & fractures
- Post-surgical healing & pain relief.
- Gut stasis (a serious digestive condition in rabbits)

Chronic conditions

- Degenerative joint disease
- Inflammatory bowel disease
- Periodontal disease
- Lick granulomas
- Geriatric care
- Hip dysplasia
- Tendonitis
- Osteoarthritis
- Chronic ear infections

Your pets laser treatment will be tailored to their specific needs, meaning that treatments will vary from patient to patient in both time and complexity.

If you would like to book an appointment or you have any questions about laser therapy, please call your local Calder Vets branch.
